INTERNSHIP HANDBOOK

Fullstack Web Development

5 projects | 1 month | Free

Prepared for Hanumanth Nayak C | IC-2026-B3929E4CEA66453D

HOW YOUR INTERNSHIP WORKS

- Work through the projects in order. Each one has its own Task Guide with materials, steps, a worked example and a checklist.
- Submit each project from the My Tasks page with a link to your work, a short note and, if useful, a file.
- A mentor reviews every submission and sends written feedback. If changes are requested, improve your work and resubmit.
- Post your offer letter on LinkedIn and submit the link (this is mandatory). When that post and every required project are approved, your completion certificate unlocks automatically. Then share the certificate on LinkedIn and submit the link; when that post is approved, your recommendation letter unlocks too. Everything is free.
- Do your own work. Plagiarised or copied work may be rejected and can end your participation.

YOUR PROJECTS AT A GLANCE

1 Personal Portfolio Landing Page
Beginner | about 6 hours
Design and code a responsive personal developer portfolio showcasing your bio, skills, and social links.

2 Interactive To-Do List with LocalStorage
Beginner | about 6 hours
Build a dynamic task manager where tasks can be added, marked complete, deleted, and persist on page reload.

3 Responsive Product Pricing Cards
Beginner | about 5 hours
Create a modern SaaS pricing card component with toggleable Monthly/Yearly billing and hover effects.

4 Live Weather Dashboard with Fetch API
Intermediate | about 8 hours
Create a weather website that fetches real-time city temperature, weather icons, and 5-day forecasts.

5 Interactive Quiz / Mini E-Commerce App
Intermediate | about 8 hours
Build an interactive multi-question quiz or simple product catalog with an interactive shopping cart.

EVERYTHING YOU WILL USE

Every tool below is free to use. Accounts are free sign-ups, never paid plans.

TOOL	**VS Code**	A free code editor from code.visualstudio.com. Install the Live Server extension to refresh the page as you save.
TOOL	**A modern browser with developer tools**	Chrome, Edge or Firefox. Press F12 and use the device toolbar to test phone sizes.
READING	**MDN: Learn web development**	The beginner HTML and CSS guides at developer.mozilla.org/en-US/docs/Learn are free and reliable.
DATA	**Your content**	Write a two-line introduction, a list of five skills and the names and one-line descriptions of two projects before you start designing.
ACCOUNT	**GitHub account**	A free account lets you publish the page with GitHub Pages.
TOOL	**VS Code with Live Server**	Free editor plus the Live Server extension to preview changes.
READING	**MDN: DOM scripting and localStorage**	Search MDN for Document Object Model introduction and Window.localStorage.
TOOL	**Browser developer tools**	The Application tab shows what is stored in localStorage so you can check your data.
TEMPLATE	**Task object shape**	Each task is an object like { id: 1, text: 'Buy milk', done: false }. Keep all tasks in one array called tasks.
READING	**MDN: CSS transitions and Grid**	Search MDN for Using CSS transitions and CSS grid layout.
DATA	**Plan content**	Write three plans such as Starter, Pro and Team, each with a monthly price, a yearly price (about 20 percent cheaper) and five features. Use made-up prices.
TOOL	**Colour contrast checker**	Free tools such as webaim.org/resources/contrastchecker help you pick readable colours.
READING	**Open-Meteo API documentation**	open-meteo.com offers free weather and geocoding APIs that need no key. Read the Forecast API and Geocoding API pages.
READING	**MDN: Using the Fetch API**	Search MDN for Using the Fetch API and async function.
DATA	**Your data array**	Write at least 8 products (name, price, image text) or 10 quiz questions (question, four options, correct answer index) as a JavaScript array. Use made-up items.

READING

MDN: Array methods

Review map, filter, find and reduce; they make cart calculations short and clear.

TOTAL EFFORT

The 5 projects take roughly 33 hours in total. Plan a steady pace and use your mentor's feedback on each project to improve the next one.
